

## A Quick Overview

Online Microschool is an excellent supplementary program to reinforce your child's education. It introduces external accountability to keep them on track with their remote learning at school for however long the pandemic persists.

If you commute to work or require childcare/afterschool care, choose Online Microschool with In-Person Childcare. All those who register for this option have complimentary access to our Microschool, meaning they can join in on their days at home.

You have **two** options:

1. [Online Microschool Only](#)
2. [Online Microschool with In-Person Childcare](#)

**To register, complete a form on [our website](#).** Your tuition and discounts will automatically calculate. After submission, we'll confirm your registration and send you an invoice to review.

**[For the full schedule, go to the last page.](#)**

## Option 1: Online Microschool only

Choose at least **one** of the following:

1. Common Core English
2. Common Core Math
3. JavaScript
4. Foreign Languages:
  - Hindi
  - Spanish
  - Mandarin Chinese
5. 3D Design & Printing
6. Funventure™ Package:
  - PE & Games (including yoga, dance, workouts, etc.)
  - Arts & Crafts (materials dropped off at your home)

## Detailed Information

Funventure classes are general classes where all ages can participate. These classes are terrific for imbuing a sense of social normalcy for kids, where they can meet old friends and make new friends, all under qualified adult supervision. This "social" time brings a sense of fun to their everyday lives all while staying at home. Materials for certain classes can be picked up at our facility or dropped off at your home.

We'll send text reminders, so don't worry!

Zoom links will be emailed every weekend. Save them so you can log in for classes. Each class will have a virtual whiteboard where students and teachers can interact and conduct real-time discussion. An IXL account will be created for each new student. Students with existing IXL accounts don't need to make a new one. Diagnostic and progress reports will be sent to track areas of strength and for improvement.

As classes progress, we may introduce new tools to facilitate better online learning. These may include Microsoft Teams and other platforms that are beneficial for kids to learn, especially in a future that expects them to know how to work and collaborate remotely and effectively. It's never too early!

**Option 2:**  
**Online Microschool *with***  
**In-Person Childcare**

**Online Microschool with In-Person Childcare means you can join classes virtually on the days you stay home for however many weeks you sign up for.**

Recommended for essential workers who cannot work from home or for parents that need uninterrupted focus to get work done. By choosing onsite (in-person care), we'll care for your kids while you do your thing. From Microschool classes to break time, your kids will be supervised by our qualified and certified staff and teachers, who are temperature-checked and screened for symptoms every morning, and who abide by the latest health directives.

This option is perfect for students who need a little more motivation to learn. Our Microschool program introduces external accountability to help those with less self-discipline or those who need immediate feedback while learning.

**Benefits of Online Microschool with In-Person Childcare:**

- allows parents to focus on work while we focus on their kids
- on days you stay home, join livestreaming classes (free)
- real, in-person childcare supervision
- actual, in-person interactions (limited, of course)
- less screen time, more "normal" time
- park excursions every day (not stuck indoors!)

**Benefits of Online Microschool Only:**

- allows parents to WFH with minimal distraction
- reap the benefits of Microschool while staying home
- participate in live, planned classes with local students
- interact virtually with students, friends, and teachers

**Schedule:**

**Full schedule on the last page.**

**Online Microschool only:**

**Subjects**

Please bring your own.

## Teacher Biographies

### Jamalys R.

A Writing Fellow at Bard College's writing center, Jamalys was trained extensively in the best ways to teach writing in an engaging manner tailored towards students. Jamalys has experience in both private one-on-one tutoring and in group sessions. She's also held monthly seminars that focus on particular aspects of English Language and Composition, such as grammar, citations, and reading comprehension. A dedicated volunteer, Jamalys worked alongside children in the Junior Wheelchair Cavaliers Basketball Program at the Achievement Center for Children. Beyond domain knowledge, Jamalys possesses immense patience and communication skills that allow her to teach effectively to all ages.

### Madison P.

Hailing from Rensselaer Polytechnic Institute (RPI) and on track to obtain a master's degree, Madison has an extensive background in mathematics and logic. She previously interned at an orthodontic and prosthetics corporation, and she intends to make a career in the medical field, particularly in designing prosthetic devices. Passionate about self-development, Madison loves learning new skills, such as web design and marketing. She's on the varsity Track and Field Team, plays three instruments, and has a twin brother.

### James S.

A Bay Area resident, James has been extended offers as a candidate for the intense Computer Science programs at Carnegie Mellon University, UC Berkeley, UCLA, and other prestigious schools with specialties in CS. He's been teaching for numerous years and knows how to keep students enthusiastically motivated when learning coding. He also has extensive experience in working for start-ups. James will be teaching JavaScript this year, which is one of the most popular languages requested by students at Young Ivy.

More biographies on the way! We have so many teachers that want to join us. Many of them are credentialed and have experience teaching at all grade levels. In fact, some of them were previously affiliated with local school districts.

***We do NOT allow students to be grouped with teachers that are concurrently teaching them at their normal schools. In our eyes, doing so would be crossing an ethical boundary.***
